

# COAL STRIKE LOSS OVER BILLION MARK

## Coal Workers \$450,000,000 in Wages and Brought Herin Massacre

### MINORITY HELD UP COUNTRY

Cleveland, Oct. 11.—The recent strike in the coal industry caused a total loss of \$1,100,000,000, J. G. Bradley, of Dundon, Va., former president of the National Coal Association, declared here today in an address before the annual convention of the American Mining Congress.

Resolutions condemning the paternalistic attitude of the Government regarding the entrance of government into private business enterprises and urging industrial co-operation between labor and capital as a means of increasing production, increasing prosperity and lowering prices, were introduced to the Resolutions Committee of the meeting.

The resolutions are to be considered by the committee, which later is to make a report to the general conference. According to the report, the loss in wages by the United Mine Workers of America as estimated by the American Educational Association was \$450,000,000, the loss to railroads over \$200,000,000, the loss to the public in the cost of the bituminous coal and the loss to the gas companies \$100,000,000.

"Many harsh things have been said about the arbitrary methods of the operators of West Virginia independent districts," he added, "but every user of coal owed them a debt of gratitude for keeping up the supply which tided the country over this summer. They have saved transportation and industry."

A telegram from Secretary of Commerce Herbert Hoover was read at the morning session expressing regret that a temporary suspension would prevent him attending the congress. "I had hoped to discuss some of the problems in our great coal industry," the telegram read, "for I feel that broad consideration and ventilation by your members of this national problem is needed for better understanding and guidance. The greatest strike in the history of industry has disclosed the most far-reaching conditions of instability and presents a challenge to the intelligence and courage of the mining industry to find its solution. This situation is not the fault of any one man or group of men, either operators or workers. It is the result of forces that have been accumulating for a number of years from many directions and have now reached the point where they constitute a danger to our social as well as our economic welfare."

The municipal bonds are free of all taxes in Pennsylvania and are not subject to the Federal income tax. The proceeds of the \$12,000,000 issue are to be used to replenish the consolidated loan fund which is used to meet payments on contracts.
